

ILC DR Emittance Correction

- One detector at every quad (776), one skew quad per sextupole pair (240).
- Lattice doesn't have specific locations for vertical correctors, so they're added approximately 1/cell (192).

ILC DR Emittance Correction

- No BPM errors at this point.
- Orbit \rightarrow Dispersion \rightarrow Coupling.
- Only partial optimization of weighting.

ILC DR Emittance Correction

- No BPM errors at this point.
